

I reject the proposal for Low Power FM to take priority over the current FM translator service. The excellent radio station K-LOVE is the station I turn to each day for news, entertainment, and encouragement. I and most people I know listen to this station regularly and enthusiastically. It is one of the few stations around that broadcasts family friendly music and news, if not the only one in this area. It is an asset to the community instilling values that benefit not only my community, but other communities that it reaches across the United States. As a nation that values variety and freedom, it would be a terrible mistake to hinder many of us by taking our very first choice in expression and making it unavailable. This radio station K-LOVE makes an investment in our society that is VALUABLE. Do not allow LPFM stations to take priority over the current translator service!
